Coding Profile : LeetCode | CodeChef

EDUCATION

Veer Surendra Sai University of Technology, Burla　　　　　　CGPA : 9.05/10.00
Bachelor of Technology in Computer Science and Engineering　　　*2020 – 2024*

Gurukul Kalinga H.S School, Jajpur　　　　　　Percentage : 91.12%
Intermediate　　　　　　*2019*

EXPERIENCE

FullStack Engineer　　　　　　March 2023 - current
FullCircle　　　　　　*remote*
- Designed and developed complete backend and frontend solutions.
- Implemented real-time updates and caching to improve performance.
- Helped to scale to 1000+ users.

Founding Team Member　　　　　　Aug 2022 - Oct 2022
FELVIN SEARCH　　　　　　*remote*
- Moved the architecture from client-side rendering to server-side rendering.
- Optimized the chrome extension and shipped with new instant apps and telemetry.
- Deployed API monitoring systems and API health tracker.

Summer Intern　　　　　　Apr 2022 - Jul 2022
FELVIN SEARCH　　　　　　*remote*
- Developed new landing page and made pre-existing landing page 25% faster.
- Solved content-security-policy related bug in their chrome extensions and launched new versions of the extension.
- Reverse engineered the DOMINO's API to order from the search bar of google itself.
- Wrote Webpack config to server side render react components using ReactDOMServer.

PROJECTS

Instant Apps (OPEN SOURCE) | *JavaScript, React, WebPack, TypeScript*　　　Link
- Instant Apps are the small interactive cards which you get for your search queries.
- A Chrome extension to display Instant Apps on the google search bar itself.
- Contributed several devtools as well as added analytics to track user interactions.
- It has around 100 GitHub Stars.

Recode-Cli | *TypeScript, Node js*　　　Link
- A Command line tool to quickly bootstrap your projects.
- It has above 6000+ weekly downloads on npm registry.
- Quickly get boilerplate code for the template project for redux, express, material UI, and others, and has a feature to add your own templates.

Confesso | *React js, Node js, Express js, MongoDB, Material UI, Redux Toolkit*　　　Link
- Full Stack Social media web app designed to tackle imposter syndrome.
- Supports CRUD operations. Used NodeJs as Backend and MongoDB as database and firebase storage for file uploading.
- Front-end uses React-js and material UI and redux toolkit for state management.

Sportify - An eCommerce site | *React js, Tailwind, Firebase Auth, Javascript, Commerce Js*　　　Link
- A headless Ecommerce site using Commercejs as its backend.
- Items are added to the cart, modified, checkout, receipt and remove. Firebase login is added.
- Fully Responsive, sleek UI, and Modern designs are key points for this.

TECHNICAL SKILLS

Languages: C/C++, SQL (Postgres), JavaScript, HTML/CSS, TypeScript
Frameworks: Nodejs, Expressjs, Reactjs, GraphQL, Nextjs, MaterialUI
Developer Tools: Git, Docker, TravisCI, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse
Databases: MongoDB, Firestore, MySQL, Postgresql
